KIRUBEL LEMMA

DevOps Engineer | Web-Hosting Engineer | Network System Operations

+251989470777 | kirubellemma13@gmail.com | Addis Ababa, Ethiopia | 02/20/2001 | Ethiopian

EDUCATION

Bachelor's Degree in Computer Science

Admas University

02/2020 - 08/2023 | Addis Ababa, Ethiopia

GPA **4.0** / 3.94

EXPERIENCE

System Engineer

Kispay

10/2025 - Present | Addis Ababa, Ethiopia

https://kispay.et/

- Maintained PostgreSQL and MySQL database servers and Mailcow email systems, ensuring 99.9% uptime for corporate communications.
- Implemented monitoring solutions (ELK Stack and Signoz) for observability. Implemented Vault for secret management.
- Designed and executed virtual machine migration to AWS using a lift-and-shift strategy.
- Provisioned and managed AWS EC2 instances, VPCs, subnets, security groups, and Elastic IPs.
- Setup IAM users, roles, and policies to enforce secure access control.
- Established secure networking, including routing, DNS configuration, and connectivity testing.
- Implemented monitoring and logging using Amazon CloudWatch for post-migration observability.
- Conducted post-migration validation, performance tuning, and cost optimization of EC2 resources.

Network and System Administrator

Hagbes PLC

12/2023 - 09/2025 | Addis Ababa, Ethiopia

https://www.hagbes.com/

- Designed and managed full DevOps environments; deployed Kubernetes clusters.
- Implemented monitoring solutions (Zabbix, Prometheus, Grafana) for observability.
- Architected and deployed scalable CI/CD pipelines using GitHub Actions for automated builds, testing, and deployments.
- Setup and optimized Docker containers to ensure high availability and fault tolerance.
- Collaborated with development teams to enhance delivery efficiency and maintain robust quality standards.
- Developed and documented product features, adhering to clean code principles and industry standards.
- Designed and implemented LAN/WAN/VLAN network infrastructure for enterprise environments.
- Set up Redis data store for caching and Apache Doris data warehouse for data and logs.
- Managed web servers (Caddy, Node.js), Nginx reverse proxy, and load balancers (HAProxy).
- Setup and managed secure network environments using OPNsense firewall and oversaw data center infrastructure spanning servers.
- Built automated CI/CD pipelines using GitHub Actions and Jenkins.

SUMMARY

DevOps Engineer with over 3 years of expertise in streamlining software delivery through advanced CI/CD automation, infrastructure as code, and container orchestration using Kubernetes and Docker. Proficient in Linux system administration and cloud migration strategies, including AWS lift-and-shift implementations. Demonstrated success in maintaining 99.9% system uptime through scalable design and robust monitoring solutions like ELK Stack and Prometheus. Adept at implementing GitOps methodologies and enhancing infrastructure security to support business-critical applications.

KEY ACHIEVEMENTS

CI/CD Pipeline Efficiency
Reduced deployment time by 40% through CI/CD pipeline automation.

High Server Uptime
Achieved 99.9% uptime of Linux servers by effective monitoring solutions.

Cloud Cost Optimization
Processed and optimized cloud resources, saving 20% in operational costs.

Successful Migration
Migrated over 20 virtual machines to AWS with minimum downtime.

Ubuntu | CentOS | RHEL

EXPERIENCE

Junior System Engineer

Atlas Computer Technology Plc

06/2023 - 12/2023 Addis Ababa, Ethiopia

https://act.com.et/

- Successfully implemented and configured USSD and mobile banking platforms, ensuring seamless integration with core banking systems.
- Monitored and optimized transaction flows, resolving service issues to maintain high uptime and reliability.
- Developed and maintained documentation for processes, configurations, and incident resolutions to support compliance and operational efficiency.

PROJECTS

Tele Cloud to AWS Migration

11/2025 - 01/2026

- Designed and executed on-premises virtual machine migration to AWS using lift-and-shift strategy.
- Provisioned and managed AWS EC2 instances, VPCs, subnets, security groups, and Elastic IPs.
- Configured IAM users, roles, and policies to enforce secure access control.
- Established secure networking, including routing, DNS configuration, and connectivity testing.
- Implemented monitoring and logging using Amazon CloudWatch for post-migration observability.
- Conducted post-migration validation, performance tuning, and cost optimization of EC2 resources.

Odoo Server Setup and Deployment

02/2025 - 06/2025

- Architected and deployed scalable CI/CD pipelines using GitHub Action for automated builds, testing, and deployments.
- Configured and optimized docker containers to ensure high availability and fault tolerance.
- Collaborated with development teams to enhance delivery efficiency and maintain robust quality standards.
- Developed and documented product features, adhering to clean code principles and industry standards.

Network & VoIP Service Installation

03/2024 - 12/2024

- Designed and implemented LAN/WAN/VLAN network infrastructure for enterprise environments.
- Configured routers, switches, and firewalls to ensure secure and reliable connectivity.
- Installed and managed VoIP systems, including IP phones, SIP trunks, and call routing.
- Configured PBX systems for voice services.
- Documented network topology, IP addressing schemes, and VoIP configurations.

Available upon request.

SKILLS

CI/CD & Automation

Jenkins · GitHub Action · GitLab CI

Containerization

Docker · Kubernetes (RKE2)

Cloud & Virtualization

AWS · OpenStack · Proxmox · VMware

Infrastructure as Code

Terraform · Ansible · OpenTofuu

Version Control

Git · GitHub · GitLab

Networking

OPNsense · UniFi · Amazom VPC

Programming & Database

BASH · Shell Script · Python · Java · MySQL · PostgreSQL · MongoDB

Monitoring

Zabbix · ELK Stack · Prometheus · SigNoz · Mimir

Mail & Proxy Servers

Zimbra · Mailcow · Nginx · Apache · Traefik
