KIRUBEL LEMMA

DevOps Engineer | Web-Hosting Engineer | Network System Operations

+251989470777 | kirubellemma13@gmail.com | Addis Ababa, Ethiopia | 02/20/2001 | Ethiopian

EDUCATION

Bachelor's Degree in Computer Science

Admas University

02/2020 - 08/2023 | Addis Ababa, Ethiopia

GPA **4.0** / 3.94

EXPERIENCE

Web-Hosting and DevOps Engineer

Ashewa Technology Solution S.C

02/2026 - Present | Addis Ababa, Ethiopia

https://ashewatechnology.com/

- Configured, maintained, and secured VPS, firewalls, and DDoS protection; managed and optimized VPN solutions for secure access.
- Installed, updated, and monitored server software; implemented backup policies, disaster recovery plans, and high uptime standards.
- Automated server tasks, account provisioning, and monitoring workflows; implemented CI/CD pipelines using GitHub and GitLab.
- Handled domain setup, DNS configuration, registrar management, and SSL certificate setup/support.
- Optimized server performance, caching strategies, and resource management; ensured security best practices and data protection compliance.
- Troubleshot hosting and domain issues efficiently; provided professional customer support for hosting-related queries.
- Managed and integrated control panels and billing systems (WHMCS readiness) for automated provisioning and payment follow-up.

System Engineer

Kispay Financial Solution S.C

10/2025 - 02/2026 | Addis Ababa, Ethiopia

https://kispay.et/

- Maintained PostgreSQL/MySQL servers and Mailcow email systems, ensuring 99.9% uptime for corporate communications.
- Designed, implemented, and maintained IPSec VPN for secure API channels with CBE, Awash Bank, M-Pesa, and Telebirr.
- Configured Jenkins for scalable CI/CD pipelines; automated builds, tests, deployments, and workflows to cut manual effort and time.
- Implemented HashiCorp Vault for secret management; configured secure storage, policies, dynamic secrets, and app integration for least-privilege access.
- Set up SigNoz for observability; deployed metrics/traces/logs monitoring, integrated OpenTelemetry, and enabled dashboards/alerting for real-time insights.
- Managed Docker containerization; built, optimized, and orchestrated containers for high availability, fault tolerance, and consistent dev/prod environments.
- Handled GitHub repo management and version control; administered repos, branches, PRs, access, and CI/CD integrations for collaborative delivery.
- Integrated SonarQube into Jenkins CI/CD pipelines; automated scans on builds/PRs to detect bugs, vulnerabilities, code smells, and duplication.
- Set up Redis as high-performance in-memory cache; configured key-value storage to speed up responses and reduce database load.
- Deployed Apache Doris as real-time MPP data warehouse; managed columnar storage and analytics for fast, sub-second queries on large logs/data.

SUMMARY

DevOps Engineer with over 3 years of expertise in streamlining software delivery through advanced CI/CD automation, infrastructure as code, and container orchestration using Kubernetes and Docker. Proficient in Linux system administration and cloud migration strategies, including AWS lift-and-shift implementations. Demonstrated success in maintaining 99.9% system uptime through scalable design and robust monitoring solutions like ELK Stack and Prometheus. Adept at implementing GitOps methodologies and enhancing infrastructure security to support business-critical applications.

KEY ACHIEVEMENTS

CI/CD Pipeline Efficiency

Reduced deployment time by 40% through CI/CD pipeline automation.

High Server Uptime

Achieved 99.9% uptime of Linux servers by effective monitoring solutions.

Network Infrastructure Optimization

Enhanced network security and reliability by deploying LAN/WAN/VLAN, IPSec VPN, CCTV, and VoIP infrastructure, improving availability and operational efficiency.

Secure Access Management

Strengthened infrastructure security by implementing IAM roles, policies, and secret management using HashiCorp Vault.

EXPERIENCE

Network and System Administrator

Hagbes Pvt. Ltd. Co.

12/2023 - 09/2025 Addis Ababa, Ethiopia

https://www.hagbes.com/

- Designed and managed full DevOps environments; deployed Kubernetes clusters.
- Implemented monitoring solutions (Zabbix, ELKStack) for observability.
- Architected and deployed scalable CI/CD pipelines using GitHub Actions for automated builds, testing, and deployments.
- Setup and optimized Docker containers to ensure high availability and fault tolerance.
- Developed and documented product features, adhering to clean code principles and industry standards.
- Designed and implemented LAN/WAN/VLAN network infrastructure for enterprise environments.
- Setup load balancer (HAProxy) for PostgreSQL.
- Setup and managed secure network environments using OPNsense firewall and oversaw data center infrastructure spanning servers.

PROJECTS

Secure Banking API Integration via IPSec VPN

11/2025 - 01/2026

- Designed and implemented secure IPSec VPN tunnels to enable encrypted API communication with financial institutions.
- Configured firewall policies, NAT rules, and routing to ensure secure and stable connectivity.
- Performed connectivity testing, packet analysis, and troubleshooting to maintain high availability.
- Documented VPN configurations, network diagrams, and integration procedures for operational continuity.

Odoo Server Setup and Deployment

02/2025 - 06/2025

- Architected and deployed scalable CI/CD pipelines using GitHub Action for automated builds, testing, and deployments.
- Configured and optimized docker containers to ensure high availability and fault tolerance.
- Collaborated with development teams to enhance delivery efficiency and maintain robust quality standards.
- Developed and documented product features, adhering to clean code principles and industry standards.

Network, CCTV, and VoIP Service Installation

03/2024 - 12/2024

- Designed and implemented LAN/WAN/VLAN network infrastructure for enterprise environments.
- Configured routers, switches, and firewalls to ensure secure and reliable connectivity.
- Installed and managed VoIP systems, including IP phones, SIP trunks, and call routing.
- Configured PBX systems for voice services.
- Documented network topology, IP addressing schemes, and VoIP configurations.
